Practice 6:	Assistant to the ambulance doctor	3 credits	V year	10th semester
		<u>Total</u> 18 credits		

YEREVAN 2020

Dear student,

An internship portfolio is a document that allows you to record the progress, successes and achievements of your internship. It will be used as an information tool to evaluate the effectiveness of the practice.

The internship portfolio will be used throughout your university studies, so it is advisable to fill it in with accurate records and keep it with care.

It has the same content for internships in different courses. You will first fill in the lines "Information about the place of internship", then, in a free composition, present your thoughts on the choice of profession, the possibilities of improvement during the internship in the section "My Education Vision". The achievement of each of the three levels of achievement of the final results provided by the internship program presented in the section "Individual work diary" will be confirmed by the intern with the signature of the supervisor of the internship.

The folder also has sections for records of internship shifts, other internships, opinions, comments, and self-analysis. At the end of the folder is given the intern's profile and the assessment by the internship supervisor.

Any documents that You find appropriate to attach to the folder (for example, photos of practical activities, assignment plan, patient consultation protocols, etc.) should include at least one brief explanation or comment as to why you attach it to your folder.

If you have any questions about the Internship and Folder, you can contact the Department of Education, the Faculty Officer or the Head of the Department.

CONTENTS		Page
1	Internship information	3
2	The vision of my education	4
3	Internship diary	5
4	Duty notes	6
5	Other activities performed during the internship	7
6	Practice summary & self-analysis	8
7	Internship assessment by the internship supervisor	9

PRACTICE 1 - NURSE ASSISTANT

1. Information about the place of internship

Name of the place of practice _____

Place of internship _____

Address, telephone numbers, website _____

Internship Supervisor _____

(name, surname, position, academic title)

2. *The vision of my education*

In this section, please indicate the current state of your professional training and opportunities for improvement during the internship. Submit your thoughts on the following questions in the form of a free essay.

a/ Why have I chosen this profession? _____

b/ What are my goal and problems as a specialist during this practice? _____

c/ What do I expect from my upcoming internship? _____

d/ How am I going to apply my knowledge during practice? _____

3. Individual work diary

Levels of expected results

I - Knowledge of the theoretical part of the question.

II - Participation, assistance in the skill development process.

III - Independent mastery of the skill.

Date	Expected knowledge, abilities and skills	Recommended level	Signature of internship supervisor
	1. Basic principles of medical ethics and deontology. Nurse-patient, nurse-doctor relationship. The appearance and moral image of the medical worker.	I

29.	Thermometer, BP measurement, pulse and respiration rate calculation, temperature sheet filling.	III	
30.	Putting aseptic and other bandages.	III	

Comments on some of the above work you have done.

4. Duty notes

Date	Content of the work done	Signature

5. Other activities performed during the internship

Date	Content of the work done	Signature

6. Summary and self-analysis of the Internship

Taking advantage of the above questions, please present your achievements, difficulties and expectations. When writing a review, you can provide specific facts by linking to the relevant folder or other materials of your choice that you can attach to the folder.

a/ My expectations before and after the practice.

b/ What significant experience did I gain during the internship?

c/ What difficulties did I encounter during the practice?

d/ What suggestions do I have?

6.1. SWOT analysis of Practice 1

Conduct a SWOT analysis of your strengths, weaknesses, opportunities and risks during your internship. The analysis will be considered "stronger" if it reflects the knowledge, approaches, theories and methods acquired from the theoretical courses. Strengths and weaknesses are the internal resources that contribute to or hinder the successful implementation of the activity, and the opportunities and risks are the relevant external factors.

Strengths	Weaknesses
Opportunities	Threats

7. Internship assessment by the internship supervisor

Student's Profile

Please briefly describe the student by analyzing his /her strengths and weaknesses during the internship. Describe in particular where and how the relevant capability was demonstrated, with reference to the relevant folder where possible.

 surname, first name, patronymic of the student

During the internship s/he showed himself/herself.

Strengths

Weaknesses

Suggestions for internship capacity building.

Intern's mark: _____

COMPONENTS OF EDUCATIONAL PRODUCTION PRACTICE ASSESSMENT

Assessment components	Points	Student's points
Duties (individual work)	14 points	
Attendances	16 points	
Ongoing testing	20 points	
Final testing	50 points
