Total		90

SKILLS GAINED DURING EDUCATIONAL TRAININGS

1. Medical manipulations and measures. Disinfection:

- 1.1. preparation of disinfection solution for cleaning the instruments;
- 1.2. preparation of triple solution,
- 1.3. usage of examination material,
- 1.4. quality control of bandages disinfection,
- 1.5. preparation of cotton rolls and tampons.

2. Preparation of doctor-dentist's workplace for patient admission.

- 2.1. care of drill – machine and handpiece,
- 2.2. checking of drill – machine's serviceability,
- 2.3. checking of sucker's serviceability,
- 2.4. drill – machine's water jet adjustment,
- 2.5. dismantling and installation of handpiece,
- 2.6. preparation of doctor's workplace,
- 2.7. sterile table preparation.

3. Filling Materials.

- 3.1. preparation and mixing of various filling materials,
- 3.2. mixing of medical linings,
- 3.3. mixing of root canal filling materials,
- 3.4. mixing of isolative linings.

4. Support of the doctor-dentist's work.

- 4.1. accurate transfer of tools;
- 4.2. oral cavity washing,
- 4.3. drug supplements.

5. First Aid.

5.1. temperature measurement,

5.2. pulse measurement,

5.3. assistance in the following emergencies:

- unconsciousness,
- collapse,
- shock,
- acute heart failure,
- epileptic attack,
- allergy anaphylactoid reactions;

5.4. anesthesia,

- subcutaneous,
- intramuscular,
- intravenous.
